

Identifying Global Mining Opportunities

IntierraLive is the world's premier tool for evaluating investment opportunities in the mining sector. It provides financial information that can be merged with resources and lease data, all of which is easily searchable and exportable for detailed analysis.

Our team of analysts interprets over 200,000 reports to the major financial markets annually.

IntierraLive covers:

- ▶ 40,000 companies
- ▶ 39,000 global projects
- ▶ 3,500 listed companies
- ▶ 160 commodities
- ▶ Global lease coverage

Benchmark investment opportunities by searching, filtering, exporting and ranking across key classes of data.

- ▶ Equity Interests
- ▶ Financial Ratios
- ▶ Feasibility Reports
- ▶ Resource and Reserve Data
- ▶ Capital Raisings
- ▶ Financial Reports
- ▶ Production Data
- ▶ Property Transactions
- ▶ Mergers & Acquisitions

IntierraLive's online mapping environment enables in-depth investigation of any investment opportunity by:

- ▶ Immediately locating on a map all of the projects and properties that comprise your investment opportunity.
- ▶ Determining if the projects are part of "hotspots".
- ▶ Understanding what established operations may be within the same geographical region.

IntierraLive allows you to achieve a researched, targeted investment opportunity within minutes.

First Quantum Minerals

"First Quantum uses Intierra as its primary research tool in evaluating acquisition opportunities. In the past 12 months First Quantum has successfully identified and subsequently purchased two outstanding projects with a value in excess of US\$700M."

Pricewaterhouse Coopers

Tim Goldsmith, Global Leader Mining Practice of PricewaterhouseCoopers commented, "IntierraLive has become an invaluable part of our research capability in the global mining sector. If we want an x-ray of a mining business - their projects, people, financials, market cap or researching capital raisings and getting transaction histories...and getting all of this quickly...we use IntierraLive."

Testimonials

For thirty years, Intierra Resource Intelligence has been the mining industry's preferred source of data, analysis and reporting. Exploration companies, mining corporations, financial services organisations and industry suppliers all take advantage of its unsurpassed resource sector intelligence.

Intierra's solutions offer unique insights into company evaluations, M&A, risk management, due diligence, competitor intelligence and project pipeline evaluation. Crucially, its sector-specific modules provide tailored, dependable, timely information upon which analysis and decisions can be swiftly and confidently made.

What our clients are saying about Intierra Resource Intelligence:

Barminco

David Noort, Group Client & Commercial Manager of Barminco commented, "IntierraLive enables us to stay ahead of trends in the industry and identify new underground mining opportunities globally. The alerting functionality flags new sales opportunities immediately. Intierra is by far the most comprehensive and reliable mining intelligence service I have used."

Standard Bank

Dr Thys Terblanche, Head of Mining & Metals Global Advisory commented, "We have been greatly impressed with the level of detail available through Intierra. The comprehensive search functions allow for effective interrogation of the database and the ability to check back to source data is a real advantage over its competitors. Both our advisory and finance businesses benefit from having reliable and up-to-date information at our fingertips."

Navigator Resources

Dr Allan Trench, Chairman of Navigator Resources commented, "Intierra is a key element in our business development activities at Navigator Resources. The integrated data, mapping and alert services offer an effective research tool and provide consolidated, up to date intelligence from a wide range of sources. We commend the support and assistance provided by Intierra personnel and congratulate them on the recently upgraded functionality of the service."

Nedbank

Dr Mark Tyler, Head of Mining & Resources commented, "Nedbank has been using Intierra to identify and analyze potential funding clients and have found that it cuts down enormously on the amount of manual effort that have had to expend on this sort of work. Intierra's databases are extensive and comprehensive and it is possible to search through the data quickly and easily. We have not been able to find another product that matches what Intierra is able to offer and I have no hesitation in endorsing it."

Barrick Gold

Raelene Kellett, Senior Exploration Geologist commented, "Barrick has been using the Intierra service for over 10 years to keep abreast of industry activities and research new opportunities. It is an important tool for our Business Development and Exploration groups. Recently we have taken advantage of Intierra's live data feed service which we now rely on to keep our internal databases up-to-date."

Argentum Silver Corporation

Dhugald Pinchin, Vice President, Business Development commented, "I love IntierraLive and use it for a variety of different purposes; benchmarking ourselves against our peers, new business development – identifying and qualifying new potential projects to buy or invest in. I have tried other services and found them to be lacking the necessary detail Intierra provides; that's why Argentum Silver Corporation uses IntierraLive for all of its mining related information needs."

Southern Cross Goldfields

Tony Truelove, Managing Director commented, "Intierra has been of great use to Southern Cross Goldfields Ltd and the 'Alerts' system has resulted in us picking up several tenements within our area of interest. The continued upgrading of the system, addition of new modules and up to date information is second to none. I would be happy to supply a personal testimonial to anyone considering purchasing a licence and look forward to a continuing relationship."
